

Reshaping Basketball Organizations Using Circular Economy and New Developments

D3.1 – Delivery of the REBOUND Intervention

Date of delivery: 29/05/2026

Author(s): Maria Iglesias, Fegaba

Project details

Project Acronym	REBOUND
Project Title	Reshaping Basketball Organizations Using Circular Economy and New Developments
Program	ERASMUS+ SPORT
Starting Date	1 January 2025
Duration	18 months
Grant Agreement No	101184531

Co-funded by the
European Union

Deliverable details

Deliverable number	D3.1
Work package number	WP3
Deliverable title	Delivery of the REBOUND Intervention
Lead beneficiary	FEGABA
Author(s)	Maria Iglesias
Due date	31/05/2026
Actual submission date	29/05/2026
Type of deliverable	Report
Dissemination level	Public

Control sheet

Version	Date	Description
V 0.1	25/05/2026	First draft

Partners

1. Background. About REBOUND project

REBOUND addresses the objective of “promoting education in and through sports” by formulating and carrying out an educational training for staff and athletes of all ages of basketball clubs, focusing on the application of circular economy methods. The project works on two levels: integrating circular economy principles into everyday club activities and incorporating them into event organization.

REBOUND specific objectives are:

- **Circular economy mapping and development:** This objective will focus on analyzing the best practices in terms of circular economy in basketball sports clubs, already in place in Europe. These will be adopted to fit the needs of staff and athletes of all ages of basketball clubs.

This objective will practically target to frame the intervention and describe the process, the tools and the practical advices for sports organizations to try different operational models to benefit them as well as the environment.

The educational manual for trainers will be developed describing the details of the training for circular economy methods, on 2 (two) levels of application:

- Everyday activities of the clubs,
- During the organization of events / games

to achieve: Environmental sustainability, Economic viability, Social Responsibility and Attract more people in basketball.

- **Implementation of REBOUND interventions:** The REBOUND interventions will consist of actions related with training staff and athletes of all ages of basketball clubs, on circular economy methods.
- **Dissemination and engagement:** This objective will focus on achieving a wide dissemination of the project’s results. Social media will be extensively used along with information provision on events, workshops, meetings where the partners will participate.

REBOUND will work on three levels by supporting the community (by developing circular economy training programs), influencing the social aspect by involving staff and athletes of all ages of basketball clubs in the process, for immediate application of knowledge influencing on a personal level by increasing circular economy beliefs and building skills to equip learners for successful and active action in implementing circular economy methods.

2. Introduction

2.1 Purpose and Scope of the document

The present deliverable outlines the implementation guidelines, methodologies and key outcomes of Task T3.1, which focused on delivering the materials developed in T2.1 and T2.2.

This deliverable is focused on documenting what was delivered, when, by whom, to whom, using which materials, and with what supporting evidence. The detailed analysis of participant feedback, satisfaction ratings and lessons learnt is presented in the complementary Deliverable D3.2 (Lessons Learnt Report).

The implementation of T3.1 was structured around three main intervention components:

- A Train-the-Trainer seminar was held by each partner, one in each country, with the aim of equipping the professionals who would subsequently deliver the REBOUND intervention to the target groups.
- Twelve training seminars were delivered to target groups across all partner countries: the REBOUND modules were delivered in the form of interactive Continuing Professional Development (CPD) seminars, using case studies and practical examples from the world of basketball and sports club management. Train-the-Trainer activities are counted separately and documented in Section 3.
- A REBOUND online repository was developed, together with a digital support guide on circular economy in sport, conceived as an open-access reference portal providing guidance and practical advice on sustainability applied to basketball and sport organisations, accessible at: <https://repository.rebound-project.eu/>

These activities supported athletes, coaches, club managers and basketball-related staff in strengthening their understanding of circular economy principles and developing practical competences for their implementation within sport organisations.

A comprehensive analysis of Task T3.1, including the results of evaluation questionnaires and participant satisfaction ratings, is presented in Deliverable D3.2 (Lessons Learnt Report), which serves as a complementary document to D3.1.

3. Train-the-Trainer Seminars

As part of Task T3.1, the REBOUND consortium implemented a series of Train-the-Trainer seminars in all participating countries in order to prepare the professionals who would subsequently deliver the REBOUND intervention to the target groups.

The Train-the-Trainer activities aimed to strengthen the trainers' understanding of circular economy principles applied to sport and familiarise them with the REBOUND Manual, training methodology and educational materials developed within the project framework.

The seminars also contributed to ensuring a consistent and high-quality implementation of the REBOUND intervention across all partner countries.

3.1 Train-the-Trainer Implementation Guidelines

As part of T3.1, each partner organisation implemented one Train-the-Trainer seminar aimed at equipping trainers with the knowledge and competences required to deliver the REBOUND intervention to the target groups in their respective countries.

The seminars targeted professionals actively involved in the basketball and sports sector, including coaches, club staff, sports management personnel and other professionals connected to the operation of basketball organisations. Participants were selected through the partners' existing networks, direct communication with clubs and federative structures, and outreach activities implemented at national level.

The Train-the-Trainer seminars served as a preparatory step for the implementation of the REBOUND intervention and aimed to familiarise trainers with:

- the principles of circular economy applied to sport
- sustainable management of sports materials and equipment
- waste reduction and resource optimisation practices
- the REBOUND Manual and educational materials developed within WP2
- pedagogical approaches for the effective delivery of the REBOUND modules to target groups

The seminars were implemented either online or in blended format, depending on the context and implementation approach of each partner organisation.

3.2 Train-the-Trainer Reports by Partner

The following sub-sections present an overview of the Train-the-Trainer seminars implemented by each partner organisation within the framework of T3.1. The information provided includes the implementation format, participant profile, training materials used and supporting evidence collected during the activities.

3.2.1 Tero PC (Greece)

Element	Information
Date	28/11/2025
Location / Platform	Online
Format	Online
No. of trainers	4
Trainer profile	Participants with experience or interest in sport-related activities and connection to basketball and/or sports club environments.
Duration	One-day seminar
Materials used	REBOUND Manual (D2.2), presentations, REBOUND online repository
Evidence available	Agenda, attendance records and supporting screenshots/photos

3.2.2 FEGABA – Galician Basketball Federation (Spain)

Element	Information
Date	28/11/2025
Location / Platform	Online
Format	Online
No. of trainers	9
Trainer profile	Coaches and technical staff from the federative environment and basketball clubs in Galicia
Duration	One-day seminar
Materials used	REBOUND Manual (D2.2), presentations, REBOUND online repository
Evidence available	Agenda, attendance records and supporting screenshots/photos

3.2.3 ASD Borgomanero Sporting Club (Italy)

Element	Information
Date	02/12/2025
Location / Platform	Online
Format	Online
No. of trainers	7
Trainer profile	Coaches and club staff with experience working with young athletes
Duration	One-day seminar
Materials used	REBOUND Manual (D2.2), presentations, REBOUND online repository
Evidence available	Agenda, attendance records and supporting screenshots/photos

3.2.4 Evnikos Sports Club (Greece)

Element	Information
Date	26/11/2025
Location / Platform	Online
Format	Online
No. of trainers	6
Trainer profile	Club trainers with direct experience managing a large grassroots basketball club
Duration	One-day seminar
Materials used	REBOUND Manual (D2.2), presentations, REBOUND online repository
Evidence available	Agenda, attendance records and supporting screenshots/photos

4. Delivery of the REBOUND Training to Target Groups

Following the completion of the Train-the-Trainer activities, the consortium partners proceeded with the implementation of the REBOUND intervention to the target groups in all participating countries.

The training activities aimed to strengthen the understanding and practical application of circular economy principles within basketball organisations through interactive seminars, practical examples and case-study-based learning activities adapted to the context of sport organisations and basketball clubs.

The implementation of the intervention combined educational presentations, practical discussions and examples of sustainable practices applicable to the day-to-day operation of basketball clubs and sporting events.

4.1 General Implementation Guidelines

As part of T3.1, each partner country was required to deliver the REBOUND modules to a minimum of 30 participants per country, engaging at least 90 participants in total across the consortium. The partners successfully exceeded this target, engaging a total of 194 participants across the four countries.

The training activities were implemented in online, in-person or blended formats, depending on the context and implementation approach of each partner organisation. The seminars were structured as short-duration training activities aimed at developing practical competences related to circular economy applied to sport. Implementation took place between November 2025 and March 2026, with each partner determining the precise dates based on their national calendars and contextual considerations.

In total, 12 training seminars were delivered across all partner countries. Each partner conducted a series of 3 seminars, while Train-the-Trainer activities were implemented separately and are documented in Section 3.

To engage the target groups effectively, partners used their existing networks, direct communication with clubs and sports organisations, dissemination through social media and project communication channels, and collaboration with associated entities and stakeholders at local and national level.

Participant satisfaction and feedback were systematically collected through evaluation questionnaires in all countries. The detailed analysis of this feedback is presented in Deliverable D3.2 (Lessons Learnt Report).

4.2 Overview of Training Content and Structure

Each seminar was organised around the modules of the REBOUND Manual (D2.2), which brings together the circular economy best practices in sport identified in the previous phase of the project

(D2.1). The material was presented in a dynamic format, combining presentations, discussions and practical examples drawn directly from the basketball environment.

The core training modules covered the following thematic areas:

- **Education & Awareness**

Introduction to circular economy principles and awareness-raising practices that promote sustainable behaviours among athletes, coaches and basketball club staff.

- **Waste Prevention and Reuse**

Approaches to reducing waste generation through reuse initiatives, recycling practices, donation systems and responsible consumption behaviours within sports organisations.

- **Sustainable Sport Activities and Events**

Methods for reducing the environmental footprint of sporting activities and events through sustainable planning, resource management and environmentally responsible practices.

- **Sustainable Management of Equipment and Materials**

Strategies to extend the lifespan of sports equipment and materials through maintenance, repair, redistribution and sustainable procurement practices.

- **Digital Transformation & Paper Reduction**

Use of digital tools and paperless procedures to improve operational efficiency and reduce resource consumption within basketball clubs and sports organisations.

The seminars also included the presentation of European good practices identified during the project research phase, as well as interactive discussions encouraging participants to explore how circular economy principles could be integrated into their own sporting environments.

4.3 Delivery Reports by Partner

The following sub-sections provide an overview of the REBOUND training seminars delivered by each partner organisation. The reports summarise the implementation approach, participant engagement and key characteristics of the activities carried out in each country.

4.3.1 Tero PC (Greece)

Session	Date(s)	Location / Platform	Format	No. Participants
1	20/03/2026	VAO	In-person	44
2	06/04/2026	DAK Pilaias	In-person	11
3	06/04/2026	DAK Pilaias	In-person	14
TOTAL	-	-	-	69

Participant profile

Club staff and athletes from basketball clubs in the Thessaloniki area, including Vyzantinos Athlitikos Omilos and DAK Pilaia. The sessions reached both young athletes and coaches, providing a combined perspective from active players and club management.

Delivery summary

Tero PC organised 3 in-person seminars between March and April 2026 in Thessaloniki, engaging staff and athletes from local basketball clubs. The sessions combined theoretical presentations with interactive discussion and practical examples, encouraging participants to adopt sustainable practices directly applicable to their clubs' daily operations.

4.3.2 FEGABA – Galician Basketball Federation (Spain)

Session	Date	Location / Platform	Format	No. Participants
1	25/02/2026	Ribadeo, Lugo	In-person	15
2	27/02/2026	Santiago de Compostela	In-person	26
3	05/03/2026	Lugo	In-person	11
TOTAL	—	—	—	52

Participant profile

Coaches and club staff from federated clubs across the four Galician provinces, together with referees from the Galician referee school, Escola Galega de Árbitros. The sessions reached both grassroots club personnel and the federative refereeing structure, reflecting the breadth of FEGABA's territorial network.

Delivery summary

FEGABA organised 3 in-person seminars between February and March 2026 in Galicia, engaging coaches, club staff and referees from its federative network. The sessions combined theoretical presentations with interactive discussion and practical examples, encouraging participants to adopt sustainable practices directly applicable to their clubs' daily operations.

4.3.3 ASD Borgomanero Sporting Club (Italy)

Session	Date	Location / Platform	Format	No. Participants
1	30/01/2026	Sporting Borgomanero offices	In-person	18
2	13/02/2026	Sporting Borgomanero offices	In-person	12
3	28/02/2026	Sporting Borgomanero offices	In-person	10
TOTAL	—	—	—	40

Participant profile

Coaches, club staff and athletes representing local basketball clubs from the Borgomanero area and surrounding region, including Carloforte Basket, Chiavenna Basket, Oleggio Basket, ASD Koala, ASD Sammaborgo, Azzurra Basket VCO, Stresa Basket, Cameri Basket, Ghemme Basket and Borgoticino Basket, as well as representatives from Pro Loco Borgomanero and local high schools. The sessions reached both grassroots club personnel and local community and educational actors, reflecting the breadth of ASD Borgomanero's territorial network.

Delivery summary

ASD Borgomanero organised 3 in-person seminars between January and February 2026 in Borgomanero, engaging coaches, club staff, athletes and representatives from community organisations and educational institutions. The sessions combined theoretical presentations with interactive discussion and practical examples, encouraging participants to adopt sustainable practices directly applicable to their clubs' daily operations.

4.3.4 Evnikos Sports Club (Greece)

Session	Date	Location / Platform	Format	No. Participants
1	06/02/2026	Evnikos Sports Club facilities	In-person	10
2	11/02/2026	Evnikos Sports Club facilities	In-person	11
3	17/02/2026	Evnikos Sports Club facilities	In-person	12
TOTAL	—	—	—	33

Participant profile

Coaches, club staff and athletes from Evnikos Sports Club, together with members from other organisations including Artemis Sports Club, ELPEN, universities (Harokopios, Piraeus, Medical University of Athens) and educational institutions (EPAL, Experimental High School of Agion Anargiron). The sessions reached both grassroots basketball personnel and representatives from educational and community organisations, reflecting the broad local network engaged by Evnikos Sports Club.

Delivery summary

Evnikos Sports Club organised 3 in-person seminars in February 2026, all held at the club's facilities in Ano Liosia, engaging coaches, club staff, athletes and representatives from educational and community organisations. The sessions combined theoretical presentations with interactive discussion and practical examples, encouraging participants to adopt sustainable practices directly applicable to their clubs' daily operations.

4.3.5 Supporting Evidence

Supporting evidence including agendas, attendance records, photographs, dissemination material and evaluation questionnaires is provided in Annex I and stored in the project shared Drive.

4.4 Participant Profiles, Selection and Feedback

Across the consortium, a total of 194 participants attended the REBOUND training delivery, exceeding the initial target of 90 participants set out in the project's work plan.

The participation criteria focused on three key aspects:

- (i) Active involvement in the world of basketball, whether as coaches, technical staff, club personnel, sports managers or active athletes.
- (ii) A professional or educational activity that directly connects them with the management or operation of sports clubs or facilities, and
- (iii) An interest in and motivation to acquire knowledge on sustainability and the circular economy, with a view to its practical application in the sporting environment.

In line with data protection requirements, only aggregated participant information is included in this deliverable. Detailed attendance records are stored in the project shared Drive and are available for internal evidence purposes.

Partner / Country	No. Seminars	No. Participants	Main profile
Tero PC - Greece	3	69	Coaches, technical staff,players
FEGABA - Spain	3	52	Coaches, technical staff, referees
ASD Borgomanero - Italy	3	40	Coaches, technical staff,players
Evnikos SC - Greece	3	33	Coaches, technical staff,players
TOTAL	12	194	

The participant profiles reflected the diversity of stakeholders involved in grassroots basketball and sports organisations across the participating countries, contributing to the exchange of experiences and perspectives throughout the implementation of the REBOUND intervention.

Feedback was systematically collected through structured evaluation questionnaires at the end of each session. The detailed analysis of participant feedback, satisfaction ratings and lessons learnt is presented in Deliverable D3.2 (Lessons Learnt Report).

5. REBOUND Online Repository

The REBOUND online repository (<https://repository.rebound-project.eu/>), developed by Tero PC in collaboration with the consortium partners, is a centralised, open-access knowledge platform designed to provide guidance, educational resources and practical tools on circular economy applied to sport.

The repository hosts carefully selected materials organised into five thematic collections:

- **Education & Awareness:** resources aimed at raising awareness and training members of the sporting community on circular economy principles.
- **Waste Prevention and Reuse:** tools, guides and examples to help clubs reduce waste generation and implement reuse practices.
- **Sustainable Sport Activities and Events:** resources for organising competitions and sporting events with a reduced environmental footprint.
- **Sustainable Management of Equipment and Materials:** best practices and tools for extending the useful life of sports equipment and materials.
- **Digital Transformation & Paper Reduction:** resources and recommendations to help clubs move towards digitalised management and reduce paper consumption.

The repository was presented at all Train-the-Trainer seminars and at the training sessions with target groups, being incorporated as a complementary reference resource to the REBOUND training programme.

The repository will continue to be maintained and updated with new content even after the conclusion of the project, ensuring continued access to current and relevant resources for all actors in the sports sector interested in the transition to circular economy models.

6. Results and Key Performance Indicators (KPIs)

This section presents the main results achieved through the implementation of Task T3.1 and provides an overview of the key performance indicators (KPIs) established for the delivery of the REBOUND intervention. The indicators were used to monitor the implementation progress and assess the extent to which the planned objectives and participation targets were achieved across the consortium.

6.1 KPI Summary Table

The implementation of Task T3.1 successfully achieved and, in several cases, exceeded the targets established in the project work plan. The table below summarises the key performance indicators related to the delivery of the REBOUND intervention.

KPI	Target	Achieved	Status
Train-the-Trainer seminars implemented	4	4	Achieved
Participants in Train-the-Trainer activities	12	24	Exceeded
Training seminars delivered	12	12	Achieved
Participants reached through training activities	90 (min. 30 per country)	194	Exceeded
REBOUND Online Repository developed and operational	1	1	Achieved
REBOUND Manual utilised during implementation	Yes	Yes	Achieved

Note: The REBOUND intervention was implemented in 3 countries, Greece, Spain and Italy, by 4 implementing partners, Tero PC, EVNIKOS SC, FEGABA and ASD Borgomanero.

6.2 Participant Distribution by Partner

The table below presents the distribution of training seminars and participants by partner organisation, including the delivery format used in each national context.

Partner / Country	No. Seminars	No. Participants	Format
Tero PC - Greece	3	69	In-person
FEGABA - Spain	3	52	In-person
ASD Borgomanero - Italy	3	40	In-person
Evnikos Sports Club - Greece	3	33	In-person
TOTAL	12	194	

The implementation results presented above demonstrate the successful delivery of the REBOUND intervention across all participating countries and confirm that the project achieved or exceeded its main performance targets. Beyond the quantitative results, the implementation process also generated valuable insights regarding participant engagement, delivery approaches and practical application of the REBOUND methodology. These aspects are further discussed in the following section.

7. Implementation Analysis

While the quantitative results demonstrate the successful delivery of the REBOUND intervention, the implementation process also provided valuable insights regarding participant engagement, organisational arrangements and the practical application of the project methodology. This section presents a brief overview of the main strengths, challenges and solutions identified during the implementation of Task T3.1 across the participating countries.

7.1 What Worked Well

The implementation of T3.1 proceeded satisfactorily across all participating countries, reaching and substantially exceeding the participation targets set out in the project's work plan. Coordination among the four consortium partners was smooth throughout the process, ensuring a coherent implementation of the REBOUND intervention across the three participating countries.

The response from the target groups was very positive in all national contexts. Participants demonstrated a high level of interest and engagement during the sessions, particularly valuing the practical usefulness of the content and its direct applicability to the day-to-day management of their clubs. The variety of formats used (in-person, online and blended) made it possible to adapt the delivery to the different contexts of each partner, maximising the reach of the intervention. The REBOUND online repository was well received at all seminars as a tool for ongoing support and reference.

7.2 Challenges Encountered

The main challenge identified during the implementation was the management of the calendar for in-person sessions. Coordinating dates and venues that suited the availability of participants — coaches and technical staff whose schedules are conditioned by competition calendars and the demands of the sporting season — represented a logistical challenge common to all partners, requiring ongoing flexibility and adaptation in planning.

7.3 Solutions Applied

To address this challenge, partners adopted a flexible strategy, distributing sessions across different dates and locations and adapting the planning to the availability of participants.

(Note: a detailed analysis of the lessons learnt and recommendations for future editions of the intervention will be developed in Deliverable D3.2.)

8. Conclusions

The implementation of Task T3.1 marked the transition of the REBOUND project from the development phase to the practical delivery of its educational intervention. Through the combined

implementation of the Train-the-Trainer activities, the training seminars and the REBOUND Online Repository, the consortium successfully transferred knowledge, tools and good practices related to circular economy principles in sport. The following sections summarise the main achievements, overall impact and contribution of the intervention to the project objectives.

8.1 Key Achievements

The implementation of Task T3.1 of the REBOUND project has successfully met all its operational objectives. Over the course of the implementation period, the consortium has achieved the following:

- Delivering 4 Train-the-Trainer seminars, one in each partner country, equipping trainers with the knowledge and competences needed to deliver the REBOUND modules effectively.
- Delivering 12 training seminars across three countries, reaching a total of 194 participants — more than twice the initial target of 90 set out in the project's work plan.
- Developing and launching the REBOUND online repository (<https://repository.rebound-project.eu/>), with five open-access thematic collections on circular economy applied to sport.
- Systematically collecting feedback at all sessions, with very positive satisfaction levels recorded across all partner countries.

8.2 Overall Impact of the Intervention

The REBOUND intervention has had a positive and measurable impact on participants across all partner countries. The participation and evaluation data collected during the implementation reflect a high level of interest and satisfaction, as well as a widespread perception that the content covered is relevant, practical and directly applicable to the day-to-day management of a basketball club.

Beyond the immediate reach of the seminars, the intervention has contributed to raising awareness of the importance of sustainability and the circular economy in the sports sector among coaches, technical staff and basketball club managers in Greece, Spain and Italy. The REBOUND online repository further ensures that this impact extends beyond the lifetime of the project.

8.3 Contribution to the Project's Objectives

The results achieved in T3.1 contribute directly to the overall objectives of the REBOUND project and the Erasmus+ Sport programme:

- They demonstrate the feasibility and transferability of the REBOUND intervention across different sporting and cultural contexts in Europe.

Co-funded by
the European Union

- They strengthen the project's empirical base through real implementation data from multiple countries, which will serve as the foundation for Deliverable D3.2 (Lessons Learnt Report).
- They contribute to the objectives of the Erasmus+ Sport programme in terms of promoting environmental sustainability in sport, educating actors in the sports sector and fostering transnational cooperation between European sports organisations.

Overall, the successful implementation of the REBOUND intervention confirms the relevance of promoting circular economy principles within basketball and grassroots sport organisations. The results achieved demonstrate that sustainability-related knowledge and practices can be effectively transferred through targeted educational activities and practical learning approaches. The experience gained during the implementation phase provides a valuable basis for future replication and supports the long-term impact of the REBOUND project beyond its formal completion.

9. Annexes

The following annexes form an integral part of this report and constitute the supporting evidence for the implementation of Task T3.1 across the participating countries. In line with data protection requirements, no named participant lists, contact details or individually identifiable information are included in this public deliverable.

Full evidence files, including agendas, attendance records, photographs, dissemination material and evaluation questionnaires, are stored in the project shared Drive and organised by partner and evidence type.

Annex I – Train-the-Trainer Seminar Overview Table

The Train-the-Trainer seminars were delivered by each partner organisation between November and December 2025, one per partner, with the aim of equipping at least 3 participants per partner with the knowledge and pedagogical tools necessary to deliver the REBOUND intervention to the target groups. Sessions were conducted online or in blended format, depending on the context and resources of each partner.

Partner	Date	Location / Platform	Format	No. Participant s	Type
Tero PC - Greece	28/11/2025	Online	Online	4 (1M / 3F)	Train-the-Trainer

Annex II – Training Seminar Overview Table

The following table provides an overview of the training seminars delivered under Task T3.1 across the participating countries. The seminars were implemented between January and April 2026 and targeted coaches, athletes, club staff, referees and other stakeholders involved in basketball and sport organisations. Together, the seminars formed the core of the REBOUND intervention, supporting the transfer of knowledge and practical tools related to circular economy principles in sport.

Partner	Session	Date	Location / Platform	Format	No. Participants	Type

Figure 8 - Training seminar hosted by Evnikos Sports Club in Ano Liosia

Note: Photographic evidence from certain training activities organised by ASD Borgomanero is not included in this public deliverable, as several photographs contain identifiable images of minors. In accordance with GDPR and data protection requirements, such material has not been reproduced in the report. The complete photographic evidence is securely stored in the project shared Drive and remains available for internal verification and audit purposes.

Annex IV - Evidence Overview per Partner

The supporting evidence gathered during the implementation of Task T3.1 is stored in the project shared Drive and organised by partner and session. The table below provides an overview of the evidence available for each partner.

Partner	Evidence collected	Storage location
Tero PC - Greece	Session agendas, attendance data, photographs, evaluation questionnaires	Project shared Drive Tero PC folder
FEGABA - Spain	Session agendas, attendance data, photographs, evaluation questionnaires	Project shared Drive FEGABA folder
ASD Borgomanero - Italy	Session agendas, attendance data, photographs, evaluation questionnaires	Project shared Drive Borgomanero folder
Evnikos SC / Greece	Session agendas, attendance data, photographs, evaluation questionnaires	Project shared Drive Evnikos folder

In accordance with data protection and GDPR requirements, photographs included in this public deliverable do not show identifiable faces of minors. Full photographic evidence, including images from in-person sessions, is stored in the project shared Drive and is available for internal verification purposes.

Annex V – Training Materials Used

‘Below are some representative extracts from the materials used in the training sessions. The full set of materials is available in the REBOUND online repository and on the project’s shared Drive.’

Figure 9 - Sample of Training Material

Annex VI – REBOUND Online Repository Evidence

The REBOUND online repository is available in open access at the following address:

<https://repository.rebound-project.eu/>
